## Project Detail : Beckett Machine

### Overview

[Images](#)[Video](#)

Beckett Machine I 2009

The Beckett Machine is an electronic artwork that endlessly performs the text of Samuel Beckett's *Waiting for Godot*.

The stage is comprised of a small Liquid Crystal Display and a series of flashing Light Emitting Diodes. The diodes represent individual characters and stage directions. They also indicate which of the acts is currently being performed.

Exhibited: International Text Festival, Bury Art Gallery, 2010.

Related Paper: *The Beckett Machine: Something Mechanical Encrusted Upon the Living* - April 2007, Repeat:Repeat Conference, 19th - 20th April 2007, University of Chester, UK.  
Positive Review in *Art Monthly*, September 2009.

Technology: PIC Microcontroller, LCD, LEDs
